

CONSERVING WATER CAN REDUCE YOUR ENVIRONMENTAL FOOTPRINT

Did you know the average North American consumes 88 gallons/4,400 liters of water per day? Conserve water to reduce your environmental impact by repairing leaky faucets, evaluating your water use, and reusing water when possible.

REDUCE YOUR IMPACT BY CONSERVING WATER

Report and repair leaking faucets in order to save water and minimize water damage.

Install low flow water devices or reduce use where possible.

Make the most of your water's lifecycle by reusing it whenever possible to conserve the earth's resources.

PARTICIPATE IN THE WATER CHALLENGE - JULY THROUGH SEPTEMBER 2020!

We encourage you to take part in the water challenge to reduce your water consumption and increase reuse at home and at work.

Track your water footprint!
