

REDUCE WASTE THIS SEASON

Reducing waste is something everyone can do! By making small changes every day such as reducing, reusing and recycling materials, we can all shrink our ecological footprint.

HERE'S HOW YOU CAN REDUCE WASTE

This month, recycle and use reusable containers when possible for food and beverages

Reduce environmental contamination by properly disposing of e-waste at a designated facility or e-waste drive

Consider using recyclable and/or reusable materials for gift wrapping to reduce waste this holiday season.

PARTICIPATE IN THE WASTE CHALLENGE - OCTOBER THROUGH DECEMBER 2020!

This quarter we encourage you reduce waste at home and at work by making small changes in your day-to-day life. Even small changes can make a big impact.

Measure your resource use by calculating your ecological footprint:
