

WASTE DIVERSION

Diverting waste materials from disposal in a landfill conserves natural resources and saves energy and carbon emissions.

HERE IS HOW YOU CAN TAKE ACTION TO DIVERT WASTE FROM LANDFILLS:

Consider switching to an electronic billing or payments system, where possible.

Look into recycling your used cartridges, either through your local recycling system or through the manufacturer's own recycling program.

Familiarize yourself with the recycling capabilities and requirements in your area, to maximize your recycling efforts.
